St. Luke's International University Graduate School of Public Health Online Open Campus

Public Health in the Digital Age

Date: Sunday, May 22, 2022

1:00–4:00 pm (Japan time)

Language: English (Japanese translation available)

Digital technologies have opened new frontiers in the field of public health. Empowered by electronic data records, big data analytics and AI, many digitally enhanced general practices, telehealth, health monitoring, and health apps are now being used to improve health communication, management, and education. In an information-rich age a better understanding is needed of how evidence-based public health can be enhanced through digital methods and technologies. This seminar and open campus provides a venue to discuss the opportunities, challenges, and public health impacts related to recent advances in health informatics. The open campus will show how the graduate school of public health is applying these principles important areas, including primary health care and patient safety, and how to enhance your career in this new world of digital health and learning.

Part I: Symposium

Keynote Speech Teng Liaw

Emeritus Professor, Head,
WHO Collaborating Centre on eHealth,
The University of New South Wales

Recent advances and developments of eHealth for primary healthcare

Lecture 1 Zoie S.Y. Wong

Associate Professor, Division of Biostatistics and Bioinformatics, St. Luke's International University Graduate School of Public Health

New Frontiers in Digital Medicine: AI-empowered Incident Reporting and Learning for Patient Safety Improvement

Q&A

Moderator Stuart Gilmour

Professor, Division of Biostatistics and Bioinformatics,
St. Luke's International University Graduate School of Public Health

Part II: Open Campus

Lecture 2

Kohei Onozaki

Professor, Division of Health Policy and Management
St. Luke's International University Graduate School of Public Health

Career development in the digital age

Introduction to the school

*This event will focus on the MPH program. The doctoral program will be introduced at a mini-open campus to be held after July.

- Outline of MPH program curriculum, Admissions and Scholarships
- Faculty Introduction
- FAQ

※The program is subject to change.

Registration

If you would like to participate in this event, please register beforehand.
